DETAILED ACTION

Response to Amendment

1. Claims 14-16 have been cancelled and Claims 43-51 have been added; therefore, Claims 1-13 and 17-51 are currently pending in application 09/755,934.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 43-50, drawn to the determining a proper benefits package, classified in class 705, subclass 1.
 - II. Claims 9-42 and 51, drawn to the managing a benefits package/system, classified in class 705, subclass 1.
3. The inventions are distinct, each from the other because of the following reasons:
4. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as determining the benefit package the best fits a company/employers based on specified criteria. In the instant case, invention II has separate utility such as managing a benefits system/package based on individual user interests. See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3629

6. Applicant is advised that a reply to this requirement must include an identification of the claim grouping (I or II) that is elected consonant with this requirement, and listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that claims are generic is considered nonresponsive unless accompanied by an election.
7. Should applicant traverse on the ground that the claim groupings are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
